

EXCLUSIVE, PART 91 ONLY, PRIVATE AIRCRAFT MANAGEMENT

91 Aviation was born out of a passion to provide a better overall service to the entire team that it takes to own, and safely operate, a Private Aircraft. Building upon years of experience with various “Charter Management” companies that seemed to only be looking after their own best interest, our team set out to set the bar higher for our owners, flight crews, and maintenance personnel. Here at 91 Aviation, we set out with a goal and focus which can be summed up by our mantra:

“Just do the right thing...”

Our Promise:

Our Promise dictates that we will always strive to provide our aircraft owners with an honest and transparent approach to the managing of their asset while providing an operating environment where safety and operational excellence are paramount. We understand and recognize that each aircraft owner and their operating requirements are unique and we will always strive to provide the most efficient application of our services to adhere to the specific needs of the individual, not the management company.

Our Vision:

Our long-term goal is to become the leading and highest respected Part 91 Private Aircraft Management Company in the United States, by resetting the standard by which all others are measured.
